

Custom Objects

Help for this Page ?

Custom objects are database tables that allow you to store data specific to your organization in Salesforce. You can use custom objects to extend Salesforce functionality or to build new application functionality.

Once you have created a custom object, you can create a custom tab, custom related lists, reports, and dashboards for users to interact with the custom object data. You can also access custom object data through the API.

Roles

CEO

Help for this Page

The users shown in the **Selected Users** list are currently assigned to the role **CEO**.

To assign other users to this role:

- Make a selection from the dropdown list to show available users.
- Choose a user on the left and add them to the **Selected Users** list.

Removing a user from the **Selected Users** list deletes the role assignment for that user.

Save Cancel
